EZY LODEC SERIES

Modular Weighbridge System

Designed with a modular system for easy assembly, efficient shipping and adjustment of size. Ezy Lodec's galvanized structure provides full protection from rust and corrosion, reducing maintenance costs. Ezy Lodec is suitable for both above ground and pit-type applications, with the ability of being relocated at a later stage with ease.

- Easy installation with modular design
- Galvanized body structure
- Both; above ground & pit-type available
- Low profile (200mm)
- Equipped with WBK Load Cell

EZY LODEC | Modular Weighbridge System

Module Structure

Ezy Lodec's modular design reduces installation time and allows the weighbridge to expand in length with additional deck modules, reaching up to 24 meters. In addition; the modular design also allows for quick and easy relocation.

Galvanised Structure

By galvanizing the whole structure, ensures that all areas whether easily accessible or not are protected by preventing rust and corrosion. The galvanized coating is metallurgically bonded to the steel structure, preventing shrinkage or cracks appearing and provides superior resistance to abrasions and water. Galvanizing has proven to be cost effective in the long term as it needs less maintenance.

Specifications

TECHNICAL DATA

Segment Size A x B (mm)	Ezy Lodec Series		
	Max. Capacity (ton)	Min. Division (kg)	Load Cell Q'ty
3000 x 6000	30~60	10~20	4
3000 x 12000	30~60	10~20	6
3000 x 18000	30~60	10~20	8
3000 x 24000	30~60	10~20	12

WEIGHBRIDGE LOAD CELLS

WBK Load Cell:

- OIML Certified
- IP68 Protection class
- Stainless Steel Body & Hermetically sealed
- Lightning protected
- Ex ia IIC T6

FEATURES

- Easy installation with modular design
- Galvanized body structure
- Both; above ground & pit-type available
- Low profile (200mm)
- Equipped with WBK Load Cells
